## Summary

Android Developer with 5+ years of commercial experience building healthcare, sports media, and connected car applications. Experienced in publishing applications on Google Play and the App Store.

## Experience

***Oct 2023 - present*** **Simply Technologies** ***Android Developer***

- Developed a connected car app (1M+ downloads) in Jetpack Compose, letting users remotely monitor and control their vehicles, and wrote 1,100+ unit and UI tests.
- Built end-to-end features including the over-the-air update flow, subscription management, and vehicle financing with leasing details.
- Initiated a refactoring introducing a single source of truth for vehicle data, adopted across 80+ ViewModels and split large ViewModels into focused manager classes, making them easier to maintain and test.
- Reviewed pull requests regularly and mentored 3 interns in the Simply Mobile Internship, guiding them through building and launching an Android app.

***Aug 2021 - Oct 2023*** **Arplusplus** ***Android Developer***

- Developed a healthcare app for a large private clinic network, with online appointments, an online pharmacy, and video consultations.
- Refactored existing Java codebase from MVP architecture to Kotlin with MVVM, replacing RxJava with Kotlin Coroutines.
- Built the online pharmacy feature with Yandex Maps integration and data caching to reduce server calls.
- Independently developed a sports media app with custom views and Kotlin Coroutines for smooth real-time updates.

## My Apps

- GenGym fitness app for Android and iOS, developed from scratch with Flutter for the mobile app and Kotlin/Spring Boot for the backend.
- Kargin Alias trivia game built with Kotlin and XML, following the MVVM architecture.

## Skills

***Languages***: Kotlin, Java
***Android***: Jetpack Compose, Jetpack Navigation, XML, ViewModel, WorkManager, LiveData, Paging 3, Room, DataStore
***Async***: Coroutines, Flow
***Architecture***: MVVM, MVI, MVP, Clean Architecture, Multi-module architecture, SOLID
***Networking***: Retrofit, OkHttp, REST, Apollo GraphQL, Kotlinx Serialization / Gson
***DI***: Hilt, Koin, Dagger 2
***Tools***: Android Studio, Git, GitHub Actions, Gradle, Firebase, CI/CD
***Testing***: JUnit 4, MockK, Turbine, Robolectric, and Compose UI testing
***AI***: Claude Code, GitHub Copilot
***Additional***: Kotlin Multiplatform (KMP), Flutter

## Education

***Sept 2014 - June 2018***

Bachelor of Science in Information Technologies (with Honors), National Polytechnic University of Armenia

## Languages

*Armenian (Native), Russian (Fluent), English (Upper-intermediate)*
